

Plant Name	Scientific	Common	Family	Date Reviewed 03/24/20
<i>Arenaria 'Wallowa Mountain'</i>		Wallowa Mountain Sandwort	Caryophyllaceae	
Propagation Method		Native to		
Division		Eastern Oregon		
Treatments (Suggested procedures)				
Collection Timing and Strategies				
In late Spring early summer tear plants apart to about 1 " pieces, try to keep some roots with every piece, directly stick them in a 2 1/2" pot. Place plants under mist for a week or so until new roots have formed move to a cool well ventilated greenhouse for finishing.				
Cultural Information				
Greenhouse conditions				
Don't over water, watch for aphids.				
Garden conditions				
Needs a well drained soil, full to partial sun. Very slow growing.
