

Plant Name	Scientific	Common	Family	Date Reviewed 03/24/20
Heterotheca jonesii x villosa 'Goldhill'		Goldhill golden-aster	Asteraceae	
Propagation Method		Native to		
Vegetative				
Treatments (Suggested procedures)				
Tip or clump cutting about 1" long. Cuttings do not like a lot of mist during propagation, but do well in a warmer (75°) environment.				
Collection Timing and Strategies				
Cuttings should be taken from non flowering shoots while plant is actively growing.				
Cultural Information				
Greenhouse conditions				
Prefers to stay on the drier side. Do not let foliage stay wet.				
Garden conditions				
Plant in full sun and in a well-drained soil. Great in a rock garden or xeric area.				
Other Expert Advice				
Keep blooms off stock plants.
