

<b>Plant Name</b>	Scientific	Common	Family	Date Reviewed 03/24/20
<a href="#">Marrubium rotundifolium</a>		Silverheels Horehound	<a href="#">Lamiaceae</a>	
<b>Propagation Method</b>		<b>Native to</b>		
Cuttings or Seed		Turkey		
<b>Treatments</b> (Suggested procedures)				
Cuttings should be taken from non-flowering stems and need to have at least 2 nodes, preferably 4. Do not place under intermittent mist, hand water or sub-irrigate. Seed germinates in about 6 days and does not need to be covered.				
<b>Collection Timing and Strategies</b>				
Collect seed in the fall when bracts have dried and turned brown. Seeds are very difficult to clean and most plants do not produce high yields. Cuttings can be taken any time the plant is growing non-flowering stems.				
<b>Cultural Information</b>				
<b>Greenhouse conditions</b>				
Keep plants dry and give good air flow.				
<b>Garden conditions</b>				
Prefers well draining soils and ful sun
