

Plant Name	Scientific	Common	Family	Date Reviewed 03/24/20
<a href="#">Salvia daghestanica</a>		PLATINUM® Sage	<a href="#">Lamiaceae</a>	
Propagation Method		Native To		
Cutting or seed		Caucasus Mountains		
Treatments (Suggested procedures)				
<p>Limited experience suggests 30 days cold stratification for seeds, and cover lightly. For cuttings use a talc of a 1:15 liquid rooting hormone. No intermittent mist is needed, after cuttings are stuck place under row cover and hand water to keep moist.</p>				
Collection Timing and Strategies				
<p>cuttings should be taken from non flowering shoots while plant is actively growing.</p>				
Cultural Information				
Greenhouse conditions				
<p>Avoid excessive amounts of water and be cautious of water sitting on foliage for extended periods of time.</p>				
Garden conditions				
<p>Prefers full sun, can tolerate partial shade. Need a dry or well drained soil.</p>				
Other expert Advice				
<p>Plants can also be divided from in ground stock plants. Plants can be slow growing so it could take several years in the garden to get large numbers for divisions.</p>
