

Plant Name	Scientific	Common	Family	Date Reviewed 03/24/20
<a href="#">Scrophularia macrantha</a>		Red Birds in a Tree	<a href="#">Scrophulariaceae</a>	
Propagation Method		Native to		
Cuttings		South Western U.S.		
Treatments (Suggested procedures)				
Cuttings should be taken from non flowering stems. Cuttings should be at least 2-4 nodes. Dip cuttings in to a 1:10 liquid rooting hormone and stick in to a well draining rooting media, under intermittent mist until rooted.				
Collection Timing and Strategies				
Cuttings can be taken anytime plants are growing non-flowering shoots.				
Cultural Information				
Greenhouse conditions				
Plants are tolerant of a wide range of conditions
