

Plant Name	Scientific	Common	Family
<i>Vitis</i> x 'St. Theresa Seedless'		St. Theresa Seedless Grape	Vitaceae
Propagation Method		Native to	
Hardwood cutting		Hybrid bred by Elmer Swenson	
Treatments (Suggested procedures)			
Cutting should have 2 nodes cut just above and just below the nodes. Direct stick into GT38 containers in March in a warm greenhouse (75F-day; 50F-night); No hormone needed.			
Collection Timing and Strategies			
Collect in mid to late November before extreme cold to avoid winter injury to the stem tissue, store in moist sand in the root cellar or cool place (32F-40F).
