**BUTTERFLY & HUMMINGBIRD GARDEN**

This garden features plants that attract butterflies and hummingbirds. Flower colors are rich and deeply saturated, blooming spring through fall. Fine textures and silver and gray foliage compliment the blossoms; evergreen foliage enlivens the winter months. All but the penstemons are deer resistant. For additional late winter and early spring color, consider adding the bulbs listed below amid the lower-growing plants in the foreground of the planting. The tulips and snow iris are not deer resistant. All plants are sun-loving and drought-tolerant, and will do best in a well-drained soil with little or no amendment.
